(Power X Handguards sold separately)

### HARDWARE INCLUDED:

Qty	Description
2	Mounting Brackets
2	6mm Bolts
2	Star Washer
2	PowerX Nut

### TOOLS REQUIRED:

- 10mm wrench

### READ ALL INSTRUCTIONS CAREFULLY BEFORE INSTALLATION!

**NOTE:** PowerMadd's Scooter Mount is designed to mount the PowerX handguards (sold separately) to most any scooter with mirrors mounted to the handlebars.

**STEP 1:** Remove your mirror bracket from the mirror mount. Re-install the mirror bracket through the PowerX Mounting bracket on as shown in Figure 1.

**STEP 2:** Determine the best location for mounting the PowerX guard by placing the PowerX Nut in the front of the handguard and holding it up the bracket you just mounted to see which holes will work best for placement. There are two holes on the bracket for vertical adjustment of the guard, and three holes on the guard nut for horizontal adjustment.

**STEP 3:** Once you determined the correct mounting holes you want to use, thread a 6mm bolt through the mounting bracket, then a star washer, then the PowerX guard and then into the PowerX Nut. **NOTE:** Make sure the star washer is in between the mounting bracket and the PowerX handguard; this keeps the guard in place.

**STEP 4:** Hold the PowerX guard in position as you tighten the bolt securely using a 10mm wrench. Then tighten the mirror mount as well. The guard should appear as in Figure 2.
