| 1   | 12 Volt Cell Phone Charger |

### TOOLS REQUIRED:

- Phillips Screw Driver
- 10mm Wrench

### **READ ALL INSTRUCTIONS CAREFULLY BEFORE INSTALLATION!**

**NOTE:** This cell phone charger can only be powered by a 12 volt DC battery. If connected to an AC electrical system damage to cell phone charger and your cell phone will result.

**STEP 1:** Connect the ring terminal from the red cable to the positive “+” battery terminal. Connect the ring terminal from the black cable to the negative “-” battery terminal.

**STEP 2:** Route cable away from any heat source to your desired location that can be conveniently reached for charging your phone.

**STEP 3:** Locate the small black electrical box away from any heat source. Zip tie small black electrical box to something secure to avoid damage.

**NOTE:** Since this cell phone charger is wired directly to your battery if a cell phone is plugged in your battery will be discharging when your machine is not running. To avoid a dead battery situation always unplug cell phone after turning off machine.

To charge Android/Windows phones: All current Android phone use the micro USB connection that came with this cell phone charger. Plug the male micro USB connector directly into your phone and your cell phone should start charging.

To charge iPhone 4 and under: A 30 pin Dock Connector to Micro USB Adapter will need to be purchased. Plug male micro USB into dock connector then plug dock connector into your iPhone and your phone should start charging.

To charge iPhone 5 and up: A Micro USB to Lightning Port Adapter will need to be purchased. Plug male micro USB into dock connector then plug dock connector into your iPhone and your phone should start charging.
