## Handguard fitment issues

Our handguard mounts kits require ½” of space on your handlebars near your grips. You may need to slide your control left or right to free up the space required.

Below are situations where we have found some fitment issues.

### ATV'S

#### Kawasaki Brute Force

**Sentinel Handguards: Use 34452 no issues**

**Star Series Handguards: Use 34252 Issues (see below)**

Left Side

Right Side

The left side needs to be mounted under the lever, and the right side needs to be mounted over the lever. Call PowerMadd at 651-462-8465 or email [techsupport@powermadd.com](mailto:techsupport@powermadd.com) and we will send you another bracket so you can mount them this way.

#### Kawasaki KFX700

Due to the large rotating shifter on the left side of the handlebars there is no space for our standard mount kits. The 34269 Tri-Mount mounts to the upsweep section of the handle bar where there is space.

**Sentinel: Use 34269**

**Star Series: Use 34269**

Left side of KFX700 handle bars has no space for our standard ATV mount kit.

**Yamaha Grizzly 700 2007-current**

**Sentinel:** 34269 or 34452 ([click here for model specific instructions](#))

**Star Series Handguards:** use 34269 mount kit

**Snowmobiles**

**Arctic Car 2012-2018 Pro Cross/Pro climb**

**Sentinel:** 34454

**Star Series:** No options

Due to the size of the brake reservoir there is no room for our standard mounting bracket.

**Arctic Cat 2019-current Pro Cross/Pro Climb**

**Sentinel:** 34456

**Star Series:** No options

Due to the size of the brake reservoir there is no room for our standard mounting bracket.

**Polaris 2015-current Axys chassis**

**Sentinel: 34454**

**Star Series: No options**

**Due to the size of the brake reservoir there is no room for our standard mounting bracket.**

**Polaris 2021-current Matrix chassis**

**Sentinel: 34456**

**Star Series: No options**

**Due to the size of the brake reservoir there is no room for our standard mounting bracket.**

**Polaris RMK 2008 Mountain**

**Sentinel: 34269**

**Star Series: 34269**

Some models have a welded tab on the bars to mount the grab bar; this does not leave enough room for the 34250 Snowmobile Mount Kit mounting bracket.

Use the 34269 Tri-Mount which mounts past the bend in the bars on the down-slope where there is plenty of room

**Yamaha Viper**

**Sentinel: 34450**

**Star Series: 34250**

Will only work with low windshields. If you have raised your handlebars or have a windshield taller than a low you will have clearance issues between the handguard and windshield.

**Yamaha 2013-2018 SR Viper and Sidewinder**

**Sentinel: 34454**

**Star Series: No option**

Due to the size of the brake reservoir there is no room for our standard mounting bracket.

**Yamaha 2019-current SR Viper and Sidewinder**

**Sentinel: 34456**

**Star Series: No option**

Due to the size of the brake reservoir there is no room for our standard mounting bracket.
